

Downloading and Using KDOT TG-Segment App (**Production**)

Prepared for KDOT

Download and install the Android app

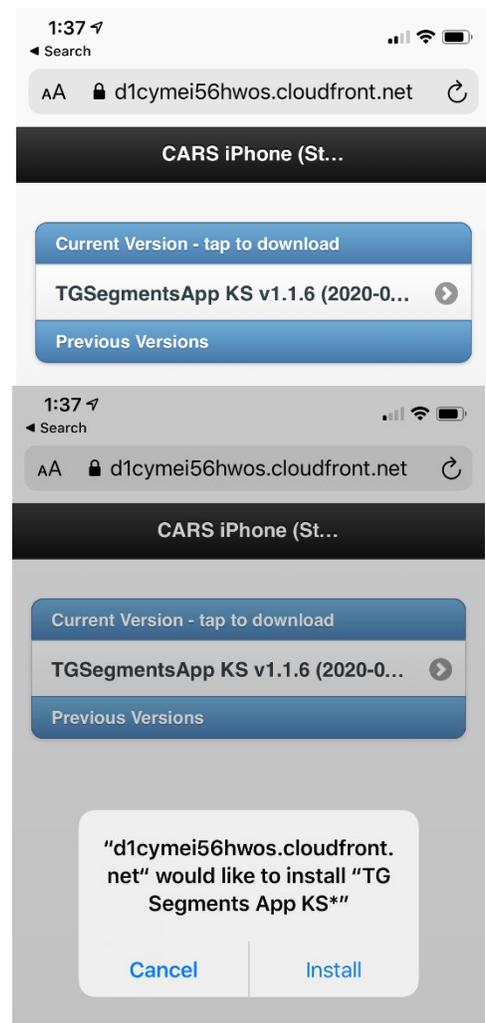

1. Go to <https://d1cyme56hwos.cloudfront.net/CarsAppAndroid/production/ks-tg-segments/> and download the current version by tapping on it.
2. In the dialog box that appears, tap **Install**. This will download and install the app onto your device.

Download and install the iOS app

Go to

<https://apps.apple.com/us/app/kansas-road-conditions/id6444685631>

1. and download the current version by tapping on it.
2. In the dialog box that appears, tap **Install**. This will download and install the app onto your device.

Running the Android KDOT TG-Segment App for the first time

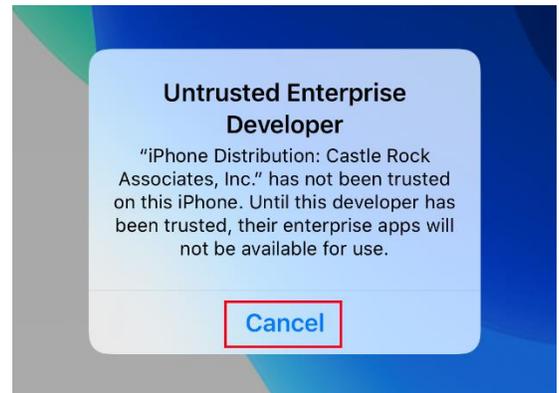

Simply launch the app by tapping the app tile on your phone. Android does not require any further steps.

Running the iOS KDOT TG-Segment App for the first time

This app is an Enterprise App and must be 'trusted' the first time it runs.

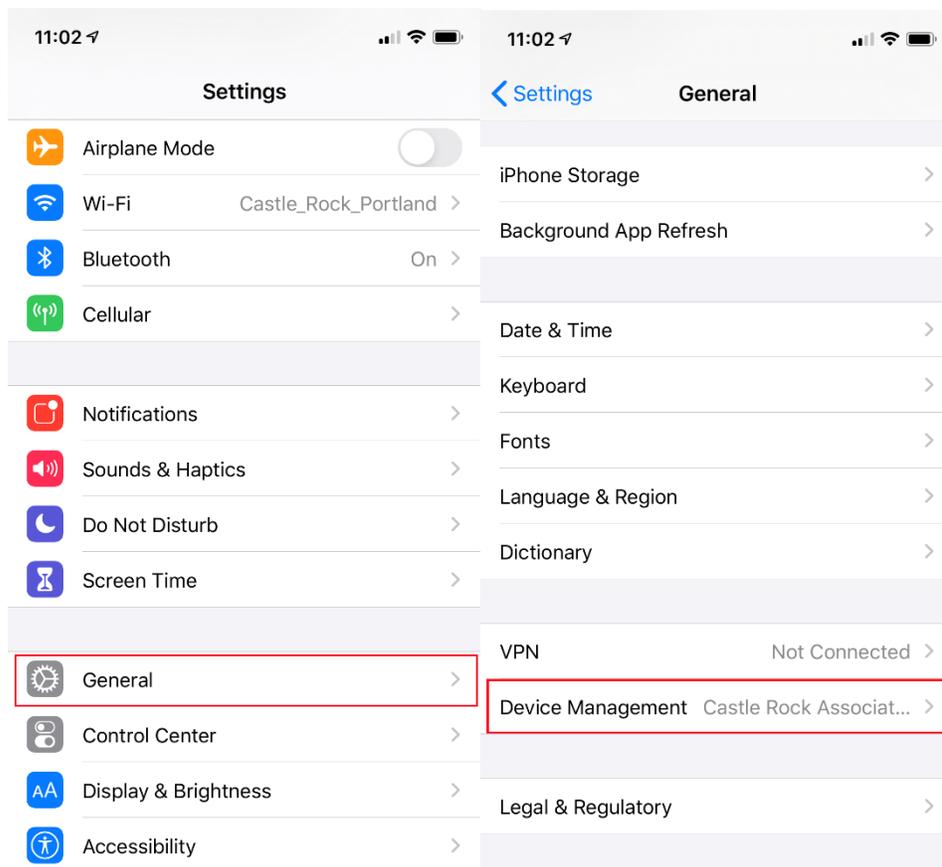

Note: An Internet connection is required to trust an enterprise developer. If you're behind a firewall, make sure it's configured to allow connections to <https://ppq.apple.com>. To trust the app:

1. On the device, launch the app, and in the "Untrusted Enterprise Developer" dialog that appears, click **Cancel**. This step adds "Device Management" to Settings.

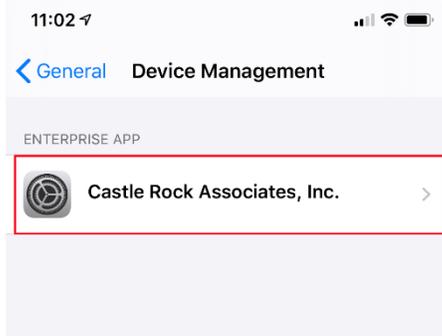

2. Tap Settings > General > Device Management.

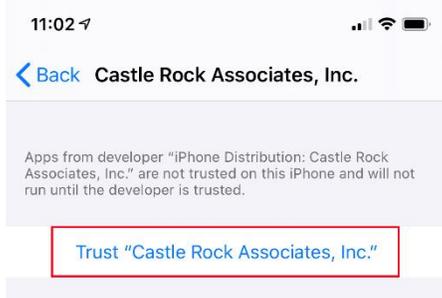

Note: If profiles are installed on your device, the setting is called Profiles & Device Management.

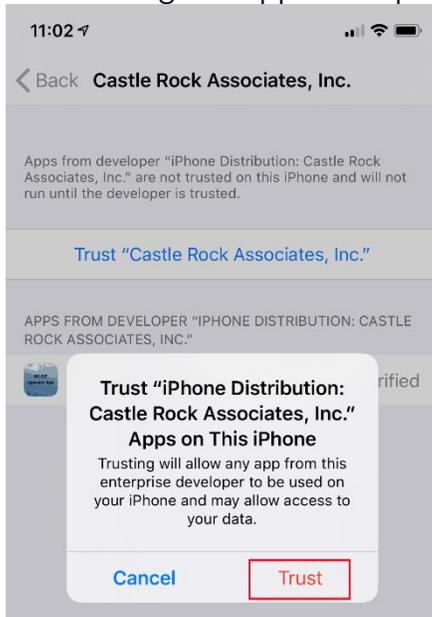

- Under Enterprise App, tap the organization name (Castle Rock Associates, Inc.)

- Tap Trust "Castle Rock Associates Inc."

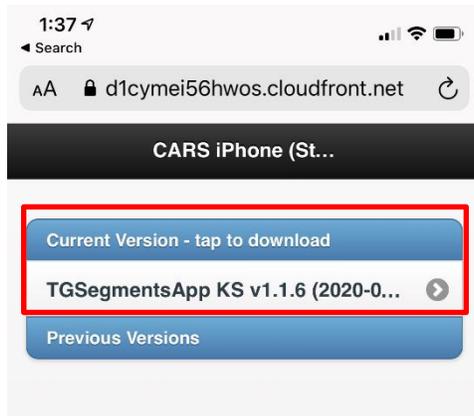

- In the dialog that appears, tap Trust.

Note: If you are not connected to the Internet, a "Not Verified" message appears. Connect the device to the Internet and tap the **Verify App** button.

Updating the app to the newest version

When a new version of the app is available, the same process is followed to download the new version. The most current version is always located in the top section of the app download page, labeled *Current Version*. Previous versions of the app are moved down to the *Previous Versions* section.

Note: It will not be necessary to follow the steps to trust the app again unless the old version of the app is deleted before downloading the new version.
